

Capabilities Statement

CAGE CODE: 9SBZ3
UEI: Y38MN3L963Y7

Over 30-years of demonstrated experience successfully delivering project management and maintenance excellence, mission assurance, project delivery and high-hazard operations oversight.

Partnering with Rudder...

THE SMARTEST DECISION YOU WILL EVER MAKE

Partnering with Rudder Strategic Intelligence (RSI) provides a level of confidence, and probability, of achieving the planned cost and delivery schedule on major high-risk projects. Additionally, Rudder's budget management, cost controls, and identification of potential risks reduce the likelihood of program cost overruns, disruptions, and delays.

WHY CHOOSE RUDDER

Rudder Strategic Intelligence (RSI) has over three decades of providing program/project, maintenance leadership and oversight of major high-risk (technically challenging) projects, programs and portfolios that have a large total budget and strategic significance.

RSI delivers project management and maintenance excellence, mission assurance, project delivery and high-hazard operations oversight throughout the government and industry. RSI monitors contractor compliance on large major high-risk government projects; both domestically and internationally where project completion is imperative. RSI has decades of experience overseeing and successfully executing complex large-scale projects and has shown time-after-time the ability to deliver within time and cost constraints.

CORE CAPABILITIES

Technical Leadership

RSI provides executive level expertise on all operational aspects of project and maintenance management, including unique requirements for radiological and research facilities and operations, including providing strategic and technical leadership for the project and operations support organizations.

RSI has in-depth knowledge and experience of projects with significant total project cost and complexity, including leading complex technical project organizations, experience leading strategic and tactical planning and execution, customer service, project continuous improvement, including management systems such as safety, security, configuration management, conduct of operations and earned value management. RSI has advanced knowledge of design, construction, and transition to operations of highly complex projects within a high security nuclear operations environment.

Technical Excellence

RSI has advanced knowledge and experience leading complex federal, industrial, commercial, and nuclear organizations, including programmatic project work, including experience with DOE O 413.3B projects. RSI has expert knowledge and expertise in the areas of scale-up, construction, engineering, fabrication, maintenance, procurement, and other project-related activities, including their interfaces and inter-dependencies.

Collaboration and Coalition Building

RSI maintains strong and effective customer relations, promotes an open and informal communication environment, to develop mutual trust and teamwork. RSI has decades of experience managing conflicts, and team dynamics, interfacing with program, project, and line management to develop clear, concise, and executable action goals and plans to address all issues or needs.

Organizational Leadership

RSI has the demonstrated ability to build successful and productive collaborations across organizational boundaries and expertly communicate with stakeholders. RSI has the exceptional ability to manage risk, investigate alternative solutions, and determine appropriate action to be performed to improve project and operations success. Additionally, RSI can negotiate with customers and influence senior-level leaders regarding matters of significance. Furthermore, RSI has a strong commitment to achieving top organizational performance, employing effective decision-making to make high quality, data-driven decisions.

Project Work

RSI has decades of experience in all aspects of engineering, procurement, construction, fabrication and maintenance projects.

RSI delivers excellence in safe execution of construction and maintenance projects and assures performance against relevant prime contract elements. RSI can assist in all planning and execution activities, and support the execution of all phases of Capital and Maintenance Projects, e.g., risk analysis and front-end planning, navigating unforeseeable events and resolving conflicts on high-risk complex projects.

PAST WORK

- Department of Energy - DOE
- Department of Defense - DOD
- Large DOT infrastructure projects
- National Security projects
- Large complex scientific projects
- Large complex federally and state funded projects
- Large industrial equipment and plant maintenance projects
- Shipbuilding programs
- Nuclear refueling programs
- National defense contractors

DIFFERENTIATORS

- Active DOE "Q" Clearance (Top Secret)
- 30-years of demonstrated experience successfully delivering project management and maintenance excellence, mission assurance, project delivery and high-hazard operations oversight throughout the government and industry. Monitored contractor compliance on large major high-risk government projects where project completion was imperative. Decades of experience overseeing and successfully executing complex large-scale projects and has shown time-after-time the ability to deliver within time and cost constraints.
- 100% customer satisfaction rate
